

Assignment 4: Forms and Pug

In this project, you will use the skills and knowledge you've gained to write Pug and work with forms.

Requirements

- Rewrite your informational website using Pug templates
- Create a layout to extend in your other .pug files
- Create some variables to pass into your Pug templates (greetings, time of day, etc.). Use these values to change information on the page.
- Add Contact form to page and console.log values
- Redirect to thank you page after submitting contact form
