

Assignment 1: Build a Website

In this project, you will use the skills and knowledge you've gained to create a basic website.

Spend some time tinkering with the code and reading errors in your console. Every project involves running into errors and having to troubleshoot them.

Requirements

- Create a basic information website on the topic of your choice.
- Must have:
 - Homepage
 - About Page
 - Contact Page - No form needed. Just add contact details.
 - 404 Page
- Spend some time making it look nice with CSS. You'll be using this website for the next several homework assignments.
